

2010 Nevada Gaming Market

Summary of Statistics, Broken Down by Reporting Area

From Wendover to Primm (and many points in between) the casino gaming landscape of Nevada covers a great deal of territory. Yet the revenues earned from the 344 or so locations scattered across the state are not evenly distributed; the vast majority of casino revenues for the state are generated in Clark County, Nevada, and the majority of them come from the Las Vegas Strip.

The top four counties generating revenues were Clark (85.42% of the state total), Washoe (7.56%), Elko (2.50%), and Douglas (2.10%). Within Clark County, the Las Vegas Strip (55.05%), Balance of County (9.88), Boulder Strip (7.34%), and Downtown Las Vegas (4.78%) were the top revenue earners.

Perhaps not surprisingly, the top revenue-earning area out-performed the rest of the state on a per-table and per-device basis. The Las Vegas Strip, for example, has 29.46% of the state's slot machines, but earned 41.85% of the state's slot revenue for the year under study. With table games, the Strip had 50.23% of all games, but earned 79.36% of all table game revenue. For the most part, all other locations under-performed, earning less per machine and per table than they should, from a strictly numerical perspective.

As a snapshot of where Nevada gaming revenues are generated, this summary is interesting, if only because it gives statistical meaning to the sense that Clark County, and the Las Vegas Strip in particular, are the drivers of Nevada's gaming revenue.

Table 1: Non-restricted Gaming Location Statistics, by Area, 2010

Reporting Area	Locations	Slots	Games	Cards	Slot Revenue	Game Revenue	Total Revenue	%Total
Carson Valley Area	21	4,416	60	12	94,022	6,757	101,470	0.98%
Churchill County	9	1,124	11	0	19,234	700	20,009	0.19%

Notes and Definitions

All non-restricted locations, State of Nevada, as of August 31, 2010.

Table 1

Locations: Total number of non-restricted gaming locations in the area in question

Slots: Total number of registered slot machines in the area in question

Games: Total number of table games in the area in question

Cards: Total number of card games (i.e., poker tables) in the area in question

Slot Revenue: Revenue of all slot machines for the period 09/01/09 to 08/31/10

Game Revenue: Revenue of all table games for the period 09/01/09 to 08/31/10

Total Revenue: Revenue of all games & devices for the period 09/01/09 to 08/31/10

% Total: Percentage of the total statewide revenue that the area in question represents

Table 2

Slot %: Percentage of statewide non-restricted slot machines found in the area in question

Game %: Percentage of statewide table games found in the area in question

Slot Rev%: Percentage of statewide non-restricted slot revenue earned in the area in question

Game Rev%: Percentage of statewide table game revenue earned in the area in question

Total Rev%: Percentage of total statewide non-restricted gaming revenue earned in the area in question
